

ACOM 1010

HF LINEAR AMPLIFIER

**Cool 700 W on all HF bands.
Light-weight, 18 kg.**

Suitable for DXpeditions and fixed operation.
A single Svetlana 4CX800A (GU-74B) high-performance tetrode is employed.

Easy to operate

The plate-load True Resistance Indicator (TRI) is an ACOM innovation that provides quick and precise tuning, typically in less than 10 seconds.
No antenna tuner needed for VSWR up to 3:1.

LED bar-graph display for peak forward power and reflected power.

Antenna selector

Two antenna outputs are selectable on the front panel of the amplifier.
