

ACOM 2000S & ACOM 2000SW

AUTOMATIC ANTENNA SELECTOR REMOTE ANTENNA SWITCH

The two units operate and are sold together.

ACOM 2000S

- Monitors “ready to transmit” parallel input signal from antenna switch and generates “transmit inhibit” output signal to the XCVR for anti-hot switching protection.
- Number of antennas selectable: 1 out of 10

ACOM 2000SW

- Switching capacity: 10 antennas to 1 output.
- Operating frequency range: 0 to 60 MHz.
- Nominal power (continuous carry)
 - for 0 to 30 MHz: 5000 W @ VSWR 1:1
1600 W @ VSWR 1:3
 - up to 60 MHz: 3600 W @ VSWR 1:1
1200 W @ VSWR 1:3
- Operating time: less than 0.15 second.
